Professional Summary

Full-stack AI Engineer with hands-on experience building and shipping production web applications using ReactJS, FastAPI (Python), and PostgreSQL. Track record of delivering live, user-facing platforms deployed on Vercel and Streamlit. Strong foundation in REST API design, relational databases, and cloud deployment, combined with practical experience in LLM integration, prompt engineering, and Retrieval-Augmented Generation (RAG).

Technical Skills

- **Languages:** Python, JavaScript, SQL
- **Frontend:** ReactJS, Vite, HTML/CSS
- **Backend & Databases:** FastAPI, RESTful API Design, PostgreSQL, MongoDB, SQL
- **Cloud, Deployment & Version Control:** Vercel, Streamlit, Git, GitHub
- **AI / LLM:** LangChain, LangGraph, OpenAI GPT-4o API, Prompt Engineering, RAG, Pinecone
- **AI/ML Frameworks:** TensorFlow, PyTorch, Scikit-learn, OpenCV, Prophet

Professional Experience

AI Engineer, Bhatia Brothers FZE

Nov 2025 – Present

Mumbai, India

- Built a full-stack AI Agent for Inventory automation platform (FastAPI, ReactJS, PostgreSQL) to analyze, price, and recommend disposal strategies for slow-moving inventory.
- Developed FastAPI backend services and ReactJS front-end dashboards for real-time inventory analytics, reducing manual stock-tracking and reorder-cycle analysis effort by 30–40%.
- Built and deployed a Prophet + LightGBM hybrid forecasting pipeline via an interactive Streamlit dashboard, improving demand prediction accuracy by 20%+.
- Designed PostgreSQL-backed data models and REST APIs supporting cross-module inventory, pricing, and forecasting workflows.

Junior Software Developer, Enirmaan Techsolutions Pvt. Ltd.

May 2025 – Sep 2025

Mumbai, India

- Built an OCR and LLM pipeline (OpenCV, EasyOCR, LLMs) to extract and structure information from documents via API endpoints.
- Collaborated cross-functionally with mobile and backend teams to integrate AI services into production APIs.

Tech Support Intern, Livingthings.ai, IIT Bombay

Oct 2024 – Feb 2025

Mumbai, India

- Analyzed IoT sensor data pipelines to optimize air-conditioner energy consumption and improve operational efficiency.
- Monitored device performance, troubleshooted technical/data issues, and validated sensor data feeding AI-driven analytics systems.

Projects

Medical Chatbot with RAG — LangChain, Pinecone

- Built a Retrieval-Augmented Generation chatbot integrating LangChain and Pinecone for context-aware medical query responses.

Health Vitals Monitoring via Video — FastAPI, OpenCV

- Built a contactless health-monitoring system estimating heart rate, SpO2, and respiration rate from facial video, served via deployed FastAPI REST APIs.

Education

M.Sc. Information Technology — S.M. Shetty College

2023 – 2025

CGPA: 7.20/10

B.Sc. Information Technology — S.M. Shetty College

2020 – 2023

CGPA: 8.18/10

Certificates

- Machine Learning — Great Learning
- Exploratory Data Analysis — Great Learning
- AWS Machine Learning Basics — Great Learning
- Complete Data Science, Machine Learning, DL, NLP Bootcamp — Udemy
